

## DATA SHEET

# Maillock Pro

Maillock Pro offers robust protection for your email messages. With multiple recipient authentication methods, instant message revocation, and customisable trigger words, it's built to safeguard confidential recipient and company data.

FUNCTION	DESCRIPTION
<b>Compose</b>	Maillock Pro lets subscribers compose and secure messages and attachments using our Outlook add-in or web app.
<b>Secure reply</b>	All recipients of a Maillock secure message can reply for free, adding any attachments as they are needed.
<b>Storage capacity</b>	Maillock Free accounts have no storage limit. All data is hosted in Microsoft Azure's European data centres, which have been 100% carbon neutral since 2012.
<b>Message retention</b>	Secure emails are retained for 365 days. After this, they're archived to meet legal requirements and can be retrieved on request by the sender.
<b>Attachments</b>	A maximum of 10 attachments can be added to a secure email, with the total size of all attachments needing to be under 30MB.
<b>Read notifications</b>	Read notifications help you track when your secure messages are opened, so you can follow up at the right time.
<b>Authentication</b>	Maillock Pro supports multiple recipient authentication methods including email verification, Q&A, SMS codes, and Unipass ID for financial professionals. Q&A allows you to ask your recipient a question only they will know the answer to. SMS authentication involves sending a code to your recipients' phones that they must input to access their secure message. Unipass ID is an authentication method that can be used to verify the identity of financial services professionals.
<b>Branding</b>	Upload your logo in the admin portal to apply company branding to secure emails and the recipient experience. This demonstrates to your recipients that you take the security of their information seriously.
<b>Security alerts</b>	Default trigger words prompt secure send prompts if found in your message subject or body. You can customise these in the admin portal.
<b>Outlook add-in</b>	The Maillock Outlook add-in brings secure messaging to your desktop, with auto-decrypt, message revocation, and activity tracking.
