Pricing	Free licence available, with paid plans starting at £3.75 per user per month.	Free licence available, with paid plans starting at £9.30 per user per month (volume -based pricing available).

Mimecast Recipient Experience

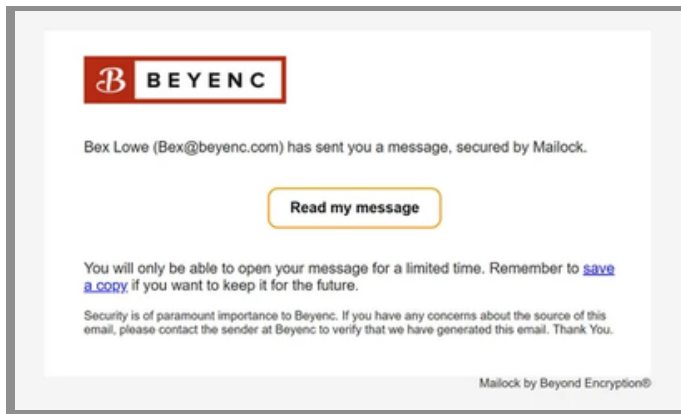

1. User receives secure email notification in their inbox.

2. Recipient is required to create an account to view secure message.

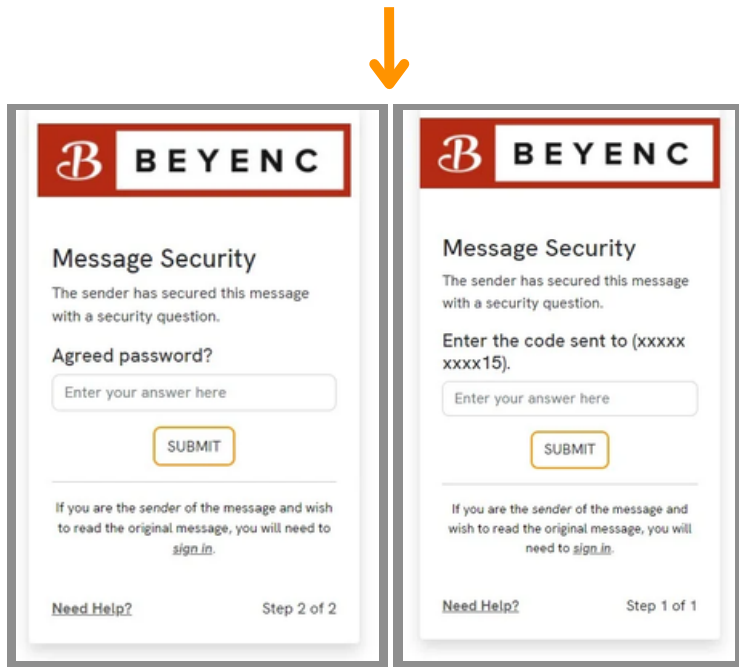

Note: While a disclaimer has been provided to deter unintended recipients, there are no steps taken (such as recipient authentication) to determine the reader's identity. The ICO warns that encryption only provides protection when an email is sent to the correct recipient.

3. Recipient logs in to secure portal where they can access their message.

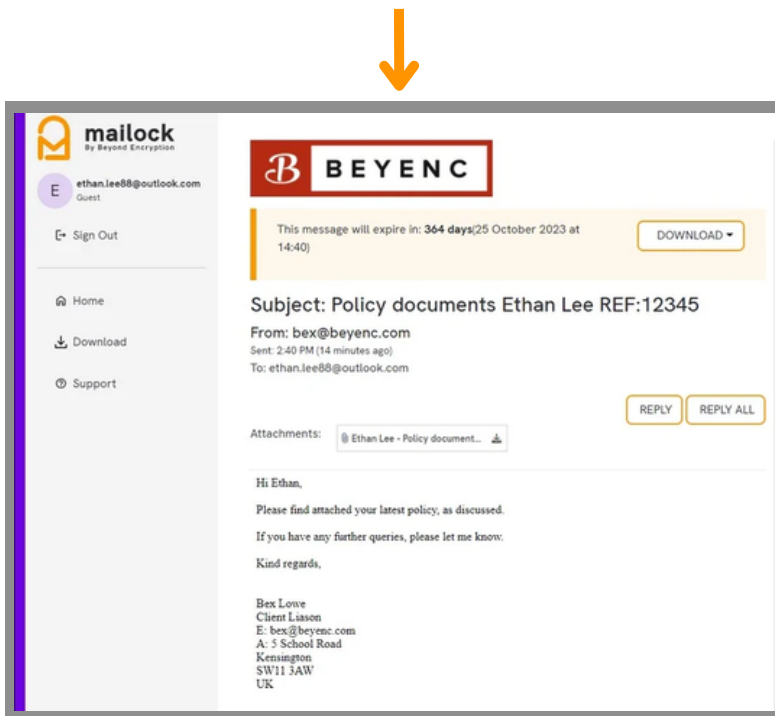

Maillock Recipient Experience

1. User receives secure email notification in their inbox.

2. Recipient must pass a pre-determined authentication challenge to prove their identity and access message contents. This challenge can be in the form of a Q&A or SMS code. Or, if the recipient works within FS, they can use their Unipass Identity to verify themselves.

3. After successfully completing the challenge, recipients gain access to their secure message. If they need to reply, they can create a new account or log-in to an existing one.
